Ash	Max	15.00 %

## INGREDIENTS

Stabilized Rice Bran and Calcium Carbonate

## FEEDING DIRECTIONS

Max-E-Glo Stabilized Rice Bran is a rich source of fat and can be used to increase caloric intake in all classes of horses. Adding fat to the diet is a safe and effective way to provide the calories needed to support growth in young horses, fuel the activity of hard working performance horses, and build body condition in underweight horses. Dietary fat also supports a slick, shiny coat. Add Max-E-Glo Stabilized Rice Bran to your current feeding program as outlined in the table below.

<b>Weanlings:</b>	2 oz per 100 pounds of body weight per day
<b>Yearlings:</b>	2 oz per 100 pounds of body weight per day
<b>Two and Three Year Olds</b>	
	Not In Training    ¾ to 1 pound per day
	In Training        1 to 1½ pounds per day
<b>Mature Horses (Based on a 1,000 lb Horse)</b>	
	Not in Work        ¾ to 1 pound per day
	Light Use           1 to 1½ pounds per day
	Heavy Use          1 to 2 pounds per day

Size:

40 lbs (11.34 kg)
